To Whom It May Concern:

It is with great pleasure that I recommend Michael Dabney for your scholarship.

Michael is in the first year of the two-year Career and Technical Education program, Programming and Software Development, that I teach. This program is rigorous and is designed to prepare students for entry-level programming positions and for college. Michael has done exceptionally well, earning straight A's all year. He is diligent about completing his assignments on-time and solving problems by himself. In class, Michael has also demonstrated leadership and teamwork. He was elected treasurer for his class, volunteered and spoke at a school assembly, and helps his classmates when they are stuck.

Michael is a member of Business Professionals of America, an organization for Career and Technical Education students. In January, he competed at the regional level and earned first place in both of the computer programming competitions that he entered. Unfortunately, the state and national level competitions were cancelled this year. I would have expected him to do very well at those advanced levels.

Besides being an excellent student, Michael has many other talents. I have heard him play piano and violin. He is really good! He has also made cookies for his classmates. Michael uses his time wisely and is a well-rounded student.

With Michael's eagerness to learn and grow, he will undoubtedly be successful in college. Michael is a very deserving recipient of your scholarship!

Sincerely,

Ms. Jami M. Little, M.Ed.
Programming & Software Development Instructor
